Glyphosate GMOs and Health

TALK BY ROBIN MESNAGE + SHORT FILM

5 Feb 2016

Wandellust.ch
Zollikerstrasse 74
8008 Zürich
19:00 - 21:00

Free Entrance

The talk and Q&A will be
held in English

Dr. Robin Mesnage is a toxicologist in the Department of Medical and Molecular Genetics at King's College London. He obtained his PhD from the University of Caen, France. He worked for 6 years in the laboratory of Prof Gilles-Eric Seralini, before joining the the Gene Expression and Therapy Group headed by Dr. Michael Antoniou at

King's College London. His research focus over the last 8 years has been on the safety evaluation of GM foods and pesticides. He is co-author on the only existing long-term toxicity study of a Roundup-tolerant GM maize, and of a complete formulation of Roundup herbicide.

Short Film in German:
Roundup (Glyphosat) - Das stille Gift
Roundup (Glyphosate) - The Silent Poison:
15,000 tons of the pesticide glyphosate are used every year in Germany. In this short documentary, ZDFzoom's research team investigates how dangerous glyphosate really is.
